

# Specialty Industrial Cleaning Lifecycle Service Solutions

## Make One Call for the Entire Lifecycle of Your Facility

Thompson Industrial Services specializes in complete Lifecycle Service Solutions for oil and gas and other major industrial facilities. Thompson is your go-to industrial cleaning services provider with the unique ability to serve a facility from the construction pre-commissioning phase through on-site daily services, outages and turnarounds, and even decommissioning. Our specialty service offerings are custom-engineered to bring your crucial equipment back to peak performance with maximized production and operational efficiency. Our expert teams seamlessly partner with you on time-sensitive turnarounds and uniquely challenging projects to reduce costs, minimize risks and maximize results.

### HYDROBLAST VACUUM & BIG PUMP

- Automated hydroblasting from 10K-40K PSI
- High-volume hydroblasting at 30x traditional volume
- Pneumatic & hydro-vacuum excavation
- Precision tank cleaning

### FINFOAM® & CHEMICAL CLEANING

- Elite chemical cleaning division with custom-engineered methods
- Vapor phase degassing/decommissioning
- FINFOAM® renews finned heat exchanger coils for maximum productivity

### LIFECYCLE SERVICE SOLUTIONS

- Construction phase cleaning support
- Pre-commissioning cleaning with advanced methods
- Daily maintenance support with efficient on-site crews
- Dedicated outage/turnaround team to optimize resource allocation
- Decommissioning services

### SPECIALTY & CUSTOM SOLUTIONS

- Dry ice blasting
- Combustible dust remediation services
- Industrial drone inspections
- In-situ SCR catalyst cleaning
- Sponge media abrasive blasting
- Custom-designed solutions to meet your most unique challenges

# Specialty Industrial Cleaning Services

Our specialty service offerings are the solutions to your toughest industrial cleaning challenges. With Thompson, you'll have access to the latest automated technologies, proprietary methods and expert teams to ensure a productive, cost-controlled project with maximum results. Bring us your unsolvable problem, and we'll engineer a safe, efficient solution customized to your plant-specific needs.

**FINFOAM®**: Maximizes production and efficiency of air-cooled heat exchangers, steam air pre-heaters, convection sections and more.

- Improves heat transfer cooling performance, prolongs unit life, and reduces maintenance and energy costs
- Safely cleans fin fans without bending or breaking
- Environmentally friendly, pH-balanced formula thoroughly removes efficiency-robbing dirt and debris other methods do not reach

**CHEMICAL CLEANING:** Global turnaround team reduces downtime and costs on turnarounds and outages.

- Turnkey services for pre-commissioning, vapor phase/degassing
- Advanced equipment, proprietary chemicals and best-in-industry experts
- Custom-designed waste minimization and disposal plans
- Unprecedented performance, safety and environmental compliance
- Seamless integration with other specialty teams to decrease downtime, maximize production and control costs on every project or turnaround

## ULTRA-HIGH-PRESSURE HYDRO-CUTTING:

Safe, efficient ultra-high-pressure hydroblasting and hydro-cutting.

- Hydro-cut through steel, concrete and refractory with 40K PSI
- Reactor and regenerator head removal at maximum precision and speed
- Safe, automated cutting tracks for hands-free operation in confined spaces
- Automated surface prep and scarification capabilities
